

# Erratic Trail

A tribute to the glacial forces that shaped our school grounds; boulders were placed along an asphalt walkway to mimic the foothills erratic trail with animal tracks to be painted along the trail weaving in and around our welcome sculpture.

A visit to the **Okotoks Erratic (Big Rock)** in Alberta, Canada on July 5, 2014. This is the world's largest (16,500 ton) glacial boulder. It is in the middle of the beautiful Southern Alberta prairies.
